**Prof. Rajesh Gopakumar**

**Harish-Chandra Institute Allahabad**

**The White Dove Conference Hall at Nave-Shalom (Wahat al-Salam)**

### **"From Higher Spins to Strings"**

I will discuss a particular case of the  $AdS_3/CFT_2$  higher spin duality which connects to a putative tensionless limit of  $AdS_3$  string theories. I will describe how the higher spin symmetries provide a natural way to organize the extended stringy symmetries of such a limit.

Additional details of the upcoming joint High Energy Physics' seminars can be found on the following link - [Joint High Energy Physics Seminars](#)
